

Vizzion
197 Forester St Unit 305,
North Vancouver, BC V7H 0A6

Dear Vizzion Hiring Team,

I'm excited to apply for the Software Engineer position at Vizzion. With a strong foundation in software development and hands-on experience supporting enterprise systems, I'm eager to contribute to your mission of delivering high-quality road imagery solutions.

During my 16-month internship at Kardium, I played a key role in the ERP go-live release, collaborating across departments to ensure data integrity and system performance. My work involved designing internal tools, optimizing SQL queries, and supporting cross-functional teams. I'm passionate about building tools that solve real-world problems and thrive in environments that value integrity, innovation, and long-term impact.

I'm particularly drawn to Vizzion's values of integrity, long-term impact, and continuous improvement. These resonate with my own approach to work—I prioritize thoughtful design, clear communication, and sustainable solutions.

I'd love the opportunity to bring my energy, curiosity, and technical skills to Vizzion's team. Thank you for considering my application. I look forward to the possibility of discussing how I can contribute to your continued success.

Sincerely,

Rey Torrecampo
